

M.E., POTS and Autonomic Dysfunction

**You are invited to join a dedicated CPD
Webinar worth 1 CPD credit point exclusively
for clinicians on May 4, 2017, at 8pm.**

A third of people with M.E. are also diagnosed with positional tachycardia syndrome (PoTS) and so this webinar will focus on how to deal with both PoTS and M.E.

Participants will learn how in those with ME/CFS they can:

- Identify symptoms suggestive of PoTS
- Test for PoTS in order to make a diagnosis
- Consider appropriate clinical management strategies

The webinar will be held by Action for M.E. Medical Advisor, Prof Julia Newton, and Dr Lesley Kavi.
